

This document provides guidance to Long Term Care Facilities (LTCFs) that are skilled nursing facilities (SNF) or assisted living residences (ALR). **Except for current mandates in effect under a Mayor’s Order or other existing local or federal regulation, any definitive action statements made in this guidance (e.g., “must”) are considered essential best practice recommendations to mitigate the spread of COVID-19.** Given the critical importance of preventing COVID-19 from entering or spreading within LTCFs, decisions on relaxing restrictions should be made with careful review of the number of facility-level and community cases, and in consultation with DC Health. **Residents and healthcare personnel should continue to follow all current infection prevention and control recommendations to protect themselves and others from COVID-19, regardless of their vaccination status.**

Activity	Outbreak Initiation Phase	Controlled Outbreak Phase	No Outbreak Phase
<b>Definitions</b>	<p>Confirmed outbreak as defined in Health Notice: <a href="#">“COVID-19 Outbreak Investigation and Reporting Requirements”</a>) <b>OR</b> a suspected outbreak as determined by DC Health after investigation, risk assessments and contact tracing.</p> <p><b>AND</b></p> <p>Results from first round of facility-wide or concentric circle testing<sup>1</sup> (i.e., outbreak testing) are still pending</p> <p><b>PLEASE NOTE:</b> DC Health must help make this determination. The threshold for required reporting is ≥1 probable or confirmed COVID-19 case in a resident or HCP <b>OR</b> ≥3 cases of acute illness compatible with COVID-19 in residents with onset within a 72h period, as stated in the Health Notice: <a href="#">“COVID-19 Outbreak Investigation and Reporting Requirements”</a>)</p>	<p>Confirmed outbreak Health Notice: <a href="#">“COVID-19 Outbreak Investigation and Reporting Requirements”</a>) <b>OR</b> a suspected outbreak as determined by DC Health after investigation, risk assessments and contact tracing.</p> <p><b>AND</b></p> <p>Results from the first round of outbreak testing reveal no additional COVID-19 cases in other areas (e.g., units) of the facility.</p> <p><b>AND</b></p> <p>Results from subsequent rounds of outbreak testing reveal no additional COVID-19 cases in other areas (e.g., units) of the facility.</p> <p><b>PLEASE NOTE:</b> DC Health must help make this determination.</p>	<p>No new COVID-19 cases in residents or staff for 14 days or as determined by DC Health.</p> <p><b>PLEASE NOTE:</b> In accordance with CMS Guidance <a href="#">QSO-20-38-NH REVISED</a>, facility-wide testing will be required if the facility:</p> <ul style="list-style-type: none"> <li>Is unable to provide necessary information required for investigation/contact tracing to DC Health <b>within 24 hours</b> of it being requested or becoming aware of the positive result (whichever is first)</li> </ul> <p><b>OR</b></p> <ul style="list-style-type: none"> <li>Does not have the expertise, resources, or ability to identify or manage all close contacts.</li> </ul>
<b>Personal Protective Equipment/Source Control</b>	<p><b>ALL residents</b> should wear a well-fitting mask when:</p> <ul style="list-style-type: none"> <li>Outside their room indoors</li> <li>Anyone enters their room (for direct care or other services, such as cleaning)</li> <li>Within 6 feet of a roommate and not separated by a barrier such as a curtain</li> </ul> <p>Staff must follow <b>Required Personal Protective Equipment (PPE) for Healthcare Facilities AND Screening in a Healthcare Setting</b> at, <a href="https://coronavirus.dc.gov/healthguidance">coronavirus.dc.gov/healthguidance</a>.</p> <ul style="list-style-type: none"> <li>Quarantine-level PPE (gown, gloves, respirators, and eye protection) should be used for residents who had a known exposure to a positive individual <b>OR</b> if transmission appears to be wide-spread within a large portion of the facility (consult with DC Health if full facility quarantine is being considered).</li> </ul>	<p><b>ALL residents</b> should wear a well-fitting mask when:</p> <ul style="list-style-type: none"> <li>Outside their room indoors</li> <li>Anyone enters their room (for direct care or other services, such as cleaning)</li> <li>Within 6 feet of a roommate and not separated by a barrier such as a curtain</li> </ul> <p>Staff must follow <b>Required Personal Protective Equipment (PPE) for Healthcare Facilities AND Screening in a Healthcare Setting</b> at, <a href="https://coronavirus.dc.gov/healthguidance">coronavirus.dc.gov/healthguidance</a>.</p> <ul style="list-style-type: none"> <li>Quarantine-level PPE (gown, gloves, respirators, and eye protection) should be used for residents who had a known exposure to a positive individual.</li> </ul>	<p><b>Residents who are unvaccinated, not up to date<sup>2</sup> on their COVID-19 vaccine OR immunocompromised<sup>3</sup> (regardless of vaccination status)</b> should wear a well-fitting mask when:</p> <ul style="list-style-type: none"> <li>Outside their room indoors</li> <li>Anyone enters their room (for direct care or other services, such as cleaning)</li> <li>Within 6 feet of a roommate and not separated by a barrier such as a curtain</li> </ul> <p><b>NOTE: All residents should wear a well-fitting mask as indicated above if a DC Mask Mandate is in effect.</b></p> <p>Staff must follow <b>Required Personal Protective Equipment (PPE) for Healthcare Facilities AND Screening in a Healthcare Setting</b> at, <a href="https://coronavirus.dc.gov/healthguidance">coronavirus.dc.gov/healthguidance</a>.</p>

<sup>1</sup> **Concentric circle testing** is a focused method that relies on risk assessments and contact tracing to determine the scope of an outbreak affecting a specific group or area (e.g., unit, floor, or department). Contacts with any documented exposure are tested first. If there is evidence of transmission in these contacts or any other newly identified exposures within the facility, testing is expanded to include new contacts. Evidence on transmission encompasses test results and risk assessment findings.

<sup>2</sup> A person is considered **up to date** with their COVID-19 vaccine after they have received all recommended doses of the vaccine, including all recommended booster doses. For current information, see *Stay Up to Date with Your COVID-19 Vaccines* at [cdc.gov/coronavirus/2019-ncov/vaccines/stay-up-to-date.html](https://cdc.gov/coronavirus/2019-ncov/vaccines/stay-up-to-date.html)

<sup>3</sup> **Immunocompromised** means having a weakened immune system due to a medical condition or from taking medications that suppress the immune system. This includes, but is not limited to: people on chemotherapy, people with blood cancers like leukemia, people who have had an organ transplant or stem cell transplant, and people on dialysis
