This document provides reopening guidance to Long Term Care Facilities (LTCFs) that are skilled nursing facilities (SNF) or assisted living residences (ALR). Except for current mandates in effect under a Mayor’s Order or other existing local or federal regulation, any definitive action statements made in this guidance (e.g., “must”) are considered essential best practice recommendations to mitigate the spread of COVID-19. Given the critical importance of preventing COVID-19 from entering or spreading within LTCFs, decisions on relaxing restrictions should be made with careful review of the number of facility-level and community cases, and in consultation with DC Health. Residents and healthcare personnel should continue to follow all current infection prevention and control recommendations to protect themselves and others from COVID-19, regardless of their vaccination status.

### Definitions

**ALL residents** should wear a well-fitting face mask when:
- Outside their room indoors
- Anyone enters their room (for direct care or other services, such as cleaning)
- Within 6 feet of a roommate and not separated by a barrier such as a curtain

Residents who are immunocompromised\(^2\) (regardless of vaccination status) or NOT fully vaccinated\(^3\) should also wear masks when outdoors and around others.

Staff must follow **Required Personal Protective Equipment (PPE)** for healthcare facilities and screening in a healthcare setting at [coronavirus.dc.gov/healthguidance](https://coronavirus.dc.gov/healthguidance)

\(^1\) Concentric circle testing is a focused method that relies on risk assessments and contact tracing in order to determine if the scope of an outbreak affecting a specific group or area (e.g., unit, floor, or department). Contacts with any documented exposure are tested first. If there is evidence of transmission in these contacts or any other newly identified exposures within the facility, testing is expanded to include new contacts. Evidence on transmission encompasses test results and risk assessment findings.

\(^2\) Immunocompromised means having a weakened immune system due to a medical condition or from taking medications that suppress the immune system. This includes, but is not limited to: people on chemotherapy, people with blood cancers like leukemia, people who have had an organ transplant or stem cell transplant, and people on dialysis.

\(^3\) Fully Vaccinated. An individual is considered fully vaccinated 14 days after completion of a COVID-19 vaccination series (after the second dose of a 2-dose series, or after one dose of a single-dose vaccine). More information can be found in Guidance for Quarantine after COVID-19 exposure at [coronavirus.dc.gov/healthguidance](https://coronavirus.dc.gov/healthguidance).

### Personal Protective Equipment/Source Control

### Coronavirus 2019 (COVID-19): Guidance for Skilled Nursing Facilities & Assisted Living Residences

**Activity**

<table>
<thead>
<tr>
<th>Communal Dining</th>
</tr>
</thead>
</table>

#### Limited Communal Dining

Communal dining is restricted. **Outbreak Initiation Phase**

- Limited communal dining is permitted for areas/unit not affected.
- Residents who meet the following criteria may eat in the same room:
  - Resident must not be from a unit/area experiencing an outbreak.
  - Resident has never tested positive for the virus that causes COVID-19. **OR**
  - Resident was previously positive for the virus that causes COVID-19 AND has completed the symptom-based or time-based clearance method

- Fully vaccinated residents can participate in communal dining without social distancing provided no unvaccinated residents are present and masks are worn when not actively eating or drinking; however, social distancing remains the safest option.

- If unvaccinated or vaccinated immunocompromised residents are present, ALL residents must maintain social distancing and wear masks when not actively eating or drinking.

#### Communal Dining

Communal dining is permitted. **No Outbreak Phase**

- Residents who meet the following criteria may eat in the same room:
  - Resident has never tested positive for the virus that causes COVID-19. **OR**
  - Resident was previously positive for the virus that causes COVID-19 AND has completed the symptom-based or time-based clearance method.

- Fully vaccinated residents can participate in communal dining without social distancing provided no unvaccinated residents are present and masks are worn when not actively eating or drinking; however, social distancing remains the safest option.

- If unvaccinated or vaccinated immunocompromised residents are present, ALL residents must maintain social distancing and wear masks when not actively eating or drinking.

- Group size and dining space must allow for social distancing when required.

- Residents who meet the following criteria must continue to be served in their rooms:
  - Currently isolated due to COVID-19
  - Currently experiencing symptoms of possible COVID-19
  - Currently quarantined due to exposure to COVID-19

**PLEASE NOTE:** Communal dining will increase the risk of COVID-19 spreading in your facility. Please be cautious by ensuring all appropriate testing and screening practices are in place before implementing any level of communal dining. Implement robust infection control measures (e.g., ensure ample access to hand hygiene supplies, ensure cleaning and disinfection of the dining area, etc.) and take measures that facilitate social distancing (e.g., remove chairs, space tables, stagger mealtimes, etc.).

</table>

**LIMITED** non-essential medical visits.

- Residents who are not on a unit/area experiencing an outbreak may leave the facility for routine/elective medical appointments with the following considerations:
  - Residents do not need to quarantine upon return, regardless of vaccination status, unless they were exposed to a person with confirmed COVID-19, Residents who have symptoms of possible COVID-19 must isolate.
  - Residents who leave the facility for medical appointments AND engage in any other activity prior to returning to the facility must follow guidelines outlined in the “Resident Outings” section of this document.
  - Residents leaving the facility who require inpatient admission to another medical facility must follow the “Plan to manage new admissions” section of this document upon return.
- Residents with laboratory-confirmed COVID-19 who have not been cleared from isolation should only leave the facility for essential medical needs (i.e., dialysis), with prior notification of the receiving facility. The receiving facility must be notified of the resident’s status and precautions required.
- Travel for medical care for COVID-19 positive residents should be provided by medical transport.

**LEAVE non-essential medical visits.**

- Residents with laboratory-confirmed COVID-19 who have not been cleared from isolation should only leave the facility for essential medical needs (i.e., dialysis), with prior notification of the receiving facility. The receiving facility must be notified of the resident’s status and precautions required.
- Travel for medical care for COVID-19 positive residents should be provided by medical transport.

**NO OUTBREAK**

- Residents may leave the facility for routine/elective medical appointments with the following considerations:
  - Residents do not need to quarantine upon return, regardless of vaccination status, unless they were exposed to a person with confirmed COVID-19, Residents with who have symptoms of possible COVID-19 must isolate.
  - Residents who leave the facility for medical appointments AND engage in any other activity prior to returning to the facility must follow guidelines outlined in the “Resident Outings” section of this document.
- Residents leaving the facility who require inpatient admission to another medical facility must follow the “Plan to manage new admissions” section of this document upon return.
- Residents with laboratory-confirmed COVID-19 who have not been cleared from isolation should only leave the facility for essential medical needs (i.e., dialysis), with prior notification of the receiving facility.
- Travel for medical care for COVID-19 positive residents should be provided by medical transport.
Limited non-medical personal care services\(^4\) that are provided within the facility are permitted for residents.

- Strongly consider routine weekly testing of non-medical personal care service personnel who have not been fully vaccinated.
- Appointments should be postponed, if possible, while outbreak investigation is underway.
- All non-medical personnel must be informed that an outbreak investigation is in progress.

For non-medical care services that occur outside the facility, see the “Outings” section on page 6).

Permitted personal care services:
- Barbers
- Hairdressers
- Non-medical nail care (manicures, pedicures, acrylics, etc.)

Residents who meet the following additional criteria should not undergo personal care services:
- Currently isolated due to COVID-19
- Currently experiencing symptoms of possible COVID-19
- Currently quarantined due to exposure to COVID-19

Screen all personnel at the beginning of their shift for fever and other symptoms of COVID-19:
- For full guidance on Screening in a Healthcare Setting and Screening Tool Guidance, visit coronavirus.dc.gov/healthguidance.

Ensure additional precautions are maintained:
- Residents must wear masks.
- Non-medical personnel must wear masks when providing personal care services.
- Provision of infection control education and competency to personnel
  - Hand hygiene.
  - Personal protective equipment.
  - Cleaning and disinfection (e.g., contact time).
- Ensure cleaning and disinfection is performed between residents using products on EPA List N.

Non-medical personal care services\(^4\) that are provided within the facility are permitted.

For non-medical care services that occur outside the facility, see the “Outings” section on page 6).

Residents who meet the following criteria should not undergo personal care services:
- Currently isolated due to COVID-19
- Currently isolated due to experiencing symptoms of possible COVID-19
- Currently quarantined due to exposure to COVID-19

Screen all personnel at the beginning of their shift for fever and other symptoms of COVID-19:
- For full guidance on Screening in a Healthcare Setting and Screening Tool Guidance, visit coronavirus.dc.gov/healthguidance.

Ensure additional precautions are maintained:
- Residents must wear masks.
- Non-medical personnel must wear masks when providing personal care services.
- Provision of infection control education and competency to personnel
  - Hand hygiene.
  - Personal protective equipment.
  - Cleaning and disinfection (e.g., contact time).
- Ensure cleaning and disinfection is performed between residents using products on EPA List N.

---

\(^4\) Personal Care Services does NOT include those essential activities of daily living or ADL’s (e.g., bathing, toileting, oral care, eating/feeding, getting dressed).
## On-Site Group Activities

**Limited on-site group activities** can occur within the facility or the facility's boundary.

- Group activities should be postponed, if possible, while investigation is underway.
- Residents who meet the following criteria may be physically present during group activities:
  - Resident must not be from a unit/area experiencing an outbreak.
  - Resident has never tested positive for the virus that causes COVID-19.
  - OR
  - Resident was previously positive for the virus that causes COVID-19 AND has completed the symptom-based or time-based clearance method

**Fully vaccinated residents** (who meet the above criteria) can participate in:

- **Indoor** on-site group activities without social distancing while wearing masks provided no unvaccinated residents are present.
- **Outdoor** on-site group activities without wearing masks or social distancing provided no unvaccinated residents are present.

If unvaccinated or vaccinated immunocompromised residents are present, **ALL** residents must maintain social distancing and wear masks.

**Group** size and activity space must allow for social distancing when indicated.

Residents who meet the following criteria should not physically* be present for group activities:

- Currently isolated due to COVID-19
- Currently experiencing symptoms of possible COVID-19
- Currently quarantined due to exposure to COVID-19

*Consider tele-participation

**PLEASE NOTE:** Group activities will increase the risk of COVID-19 spreading in your facility. Implement robust infection control measures (e.g., encourage residents to wear masks, ensure ample access to hand hygiene supplies, ensure robust cleaning and disinfection of activity space and equipment, etc.) and take measures to facilitate social distancing (e.g., remove chairs, space tables, stagger activity start and end times, etc.).

### Outbreak Initiation Phase

#### Limited on-site group activities

Residents who meet the following criteria may be physically present during group activities:

- Resident must not be from a unit/area experiencing an outbreak.
- Resident has never tested positive for the virus that causes COVID-19.
- OR
- Resident was previously positive for the virus that causes COVID-19 AND has completed the symptom-based or time-based clearance method

**Fully vaccinated residents** (who meet the above criteria) can participate in:

- **Indoor** on-site group activities without social distancing while wearing masks provided no unvaccinated residents are present.
- **Outdoor** on-site group activities without wearing masks or social distancing provided no unvaccinated residents are present.

If unvaccinated or vaccinated immunocompromised residents are present, **ALL** residents must maintain social distancing and wear masks.

**Group** size and activity space must allow for social distancing when indicated.

Residents who meet the following criteria should not physically* be present for group activities:

- Currently isolated due to COVID-19
- Currently experiencing symptoms of possible COVID-19
- Currently quarantined due to exposure to COVID-19

*Consider tele-participation

**PLEASE NOTE:** Group activities will increase the risk of COVID-19 spreading in your facility. Implement robust infection control measures (e.g., encourage residents to wear masks, ensure ample access to hand hygiene supplies, ensure robust cleaning and disinfection of activity space and equipment, etc.) and take measures to facilitate social distancing (e.g., remove chairs, space tables, stagger activity start and end times, etc.).

### Outbreak Control Phase

**On-site group activities** can occur within the facility or the facility's boundary.

Residents who meet the following criteria may be physically present during group activities:

- Resident has never tested positive for the virus that causes COVID-19.
- OR
- Resident was previously positive for the virus that causes COVID-19 AND has completed the symptom-based or time-based clearance method

**Fully vaccinated residents** (who meet the above criteria) can participate in:

- **Indoor** on-site group activities without social distancing while wearing masks provided no unvaccinated residents are present.
- **Outdoor** on-site group activities without wearing masks or social distancing provided no unvaccinated residents are present.

If unvaccinated or vaccinated immunocompromised residents are present, **ALL** residents must maintain social distancing and wear masks.

**Group** size and activity space must allow for social distancing when indicated.

Residents who meet the following criteria should not physically* be present for group activities:

- Currently isolated due to COVID-19
- Currently experiencing symptoms of possible COVID-19
- Currently quarantined due to exposure to COVID-19

*Consider tele-participation

**PLEASE NOTE:** Group activities will increase the risk of COVID-19 spreading in your facility. Implement robust infection control measures (e.g., encourage residents to wear masks, ensure ample access to hand hygiene supplies, ensure robust cleaning and disinfection of activity space and equipment, etc.) and take measures to facilitate social distancing (e.g., remove chairs, space tables, stagger activity start and end times, etc.).
Resident field trips are not permitted. Resident outings should be strongly discouraged.

- Residents who leave the facility for non-medical community activities must follow the following guidelines:
  - Residents and those accompanying them must:
    - Wear masks during the entire outing (if possible) and maintain social distancing while outside the facility.
    - If a resident is fully vaccinated, they can choose to have close contact (including touch) with others in the community while wearing a mask. If taking a walk outdoors and not in close contact with the community, a mask is not necessary.
    - Fully vaccinated residents visiting friends or family that are also fully vaccinated may choose to interact outdoors without masks or physical distancing.
    - Physical touch for an extended period of time with unvaccinated people or people with unknown vaccination status should be avoided.
    - Immunocompromised residents should wear a mask and always maintain social distancing, regardless of vaccination status.
    - Physical touch for an extended period of time with unvaccinated people or people with unknown vaccination status should be avoided.
    - Immunocompromised residents should wear a mask and always maintain social distancing, regardless of vaccination status.

  - Residents and those accompanying them must:
    - Clean hands frequently, using alcohol-based hand sanitizer when soap and water is not available.
    - Facilities must keep a log of activities to assist in completing the risk assessment and allow for contact tracing if needed.
    - Residents and family members should be educated about potential risks of public settings and to avoid crowded, poorly ventilated areas.
    - Residents and family members should be informed an outbreak investigation is in progress and associated risks.
    - Upon return:
      - All residents must be screened for symptoms of COVID-19.
      - Residents who are not fully vaccinated and immunocompromised residents (regardless of vaccination status) in facilities where 85% or more of the residents are fully vaccinated.
    - If a risk assessment is completed, residents determined to have participated in a higher risk activity must quarantine.

The “Risk Assessment for Community Visits” can be found at coronavirus.dc.gov/healthguidance.

Resident field trips are permitted for those who ARE NOT on a unit/area experiencing an outbreak. Resident outings should be strongly discouraged for those who ARE on a unit experiencing an outbreak.

- Residents who leave the facility for non-medical community activities must follow the following guidelines:
  - Residents and those accompanying them must:
    - Wear masks during the entire outing (if possible) and maintain social distancing while outside the facility.
    - If a resident is fully vaccinated, they can choose to have close contact (including touch) with others in the community while wearing a mask. If taking a walk outdoors and not in close contact with the community, a mask is not necessary.
    - Fully vaccinated residents visiting friends or family that are also fully vaccinated may choose to interact outdoors without masks or physical distancing.
    - Physical touch for an extended period of time with unvaccinated people or people with unknown vaccination status should be avoided.
    - Immunocompromised residents should wear a mask and always maintain social distancing, regardless of vaccination status.
    - Physical touch for an extended period of time with unvaccinated people or people with unknown vaccination status should be avoided.
    - Immunocompromised residents should wear a mask and always maintain social distancing, regardless of vaccination status.

  - residents and those accompanying them must:
    - Clean hands frequently, using alcohol-based hand sanitizer when soap and water is not available.
    - Facilities must keep a log of activities to assist in completing the risk assessment and allow for contact tracing if needed.
    - Residents and family members should be educated about potential risks of public settings and to avoid crowded, poorly ventilated areas.
    - Residents and family members should be informed an outbreak investigation is in progress and associated risks.
    - Upon return:
      - All residents must be screened for symptoms of COVID-19.
      - Facilities must complete a resident risk assessment to evaluate the need for quarantine for:
        - All residents in facilities where less than 85% of the residents are fully vaccinated.
        - Residents who are not fully vaccinated and immunocompromised residents (regardless of vaccination status) in facilities where 85% or more of the residents are fully vaccinated.
      - If a risk assessment is completed, residents determined to have participated in a higher risk activity must quarantine.

The “Risk Assessment for Community Visits” can be found at coronavirus.dc.gov/healthguidance.

</tbody>
</table>
## Testing residents

Test residents all residents in the facility, regardless of vaccination status (excluding those isolated due to positive COVID-19 status at time of specimen collection and those positive within the previous 90 days and recovered) if:

- ≥1 case in a resident ≥ 14 days after admission/readmission;
- ≥3 cases in staff within 14 days;
- ≥3 cases in individuals (e.g., visitors, vendors) associated with a specific location/department within 14 days or epidemiological link within the facility.
- OR
  - It is determined necessary by DC Health after investigation/contact tracing.

If initial testing reveals no additional COVID-19 cases and existing cases are contained within a single area/unit, then PCR testing (regardless of vaccination status) of quarantined residents or affected units continues every 3-7 days as instructed by DC Health.

Exclude residents from testing who:

- Are isolated due to positive COVID-19 status at time of specimen collection
- Have tested positive within the previous 90 days and recovered.

## Routine testing

Routine testing of all residents (for surveillance or outbreak purposes) is not required if:

- ≤2 staff test positive within a 14-day period
  - AND
  - 0 residents test positive within a 14-day period
  - AND
  - ≤2 cases in individuals (e.g., visitors, vendors) associated with a specific location/department within 14 days or epidemiological link within the facility.
  - AND
  - After there have been two consecutive weeks (i.e., >14 days) of no new test results in staff and residents from facility-wide outbreak testing (using an FDA approved PCR test)

## As Needed (PRN) Testing

Test any resident as needed who meets the following criteria:

- Showing symptoms of possible COVID-19
- Exposed to another resident, staff or visitor who was confirmed to have COVID-19:
  - Resident must be tested immediately (but not earlier than 2 days after exposure) and, if negative, 5-7 days after exposure.
- Those who have tested positive for COVID-19 and recovered within the previous 90 days who develop new symptoms of COVID-19 should be evaluated by an HCP for testing

Test any resident as needed who meets the following criteria:

- Showing symptoms of possible COVID-19
- Exposed to another resident, staff or visitor who was confirmed to have COVID-19:
  - Resident must be tested immediately (but not earlier than 2 days after exposure) and, if negative, 5-7 days after exposure.
- Those who have tested positive for COVID-19 and recovered within the previous 90 days who develop new symptoms of COVID-19 should be evaluated by an HCP for testing

Test any resident as needed who meets the following criteria:

- Showing symptoms of possible COVID-19
- Exposed to another resident, staff or visitor who was confirmed to have COVID-19:
  - Resident must be tested immediately (but not earlier than 2 days after exposure) and, if negative, 5-7 days after exposure.
- Those who have tested positive for COVID-19 and recovered within the previous 90 days who develop new symptoms of COVID-19 should be evaluated by an HCP for testing

## Testing staff

**Activity**

- Submit daily line list of residents and staff who are newly positive for COVID-19 to the Healthcare Facilities Investigation Team daily, Monday-Friday, excluding holidays (in accordance with DCMR Chapter 22B 208.2, 22B 201.1(ff) and 201.1 (gg), D.C. Official Code § 7-138).

**Please Note:** There is no need to report residents who are transferred into your facility with laboratory-confirmed COVID-19.

Submit at least weekly data to National Healthcare Safety Network (NHSN) Skilled nursing facilities:

- Reporting requirements for nursing homes became effective on May 8, 2020 when CMS published their interim final rule with comment: govnfo.info/content/pkg/FR-2020-05-08/pdf/2020-09608.pdf

Assisted living residences:

- While ALRs do not have the same federal requirement to report to NSHN as nursing homes, their participation is encouraged.

---

**Activity**

- Routine testing intervals as indicated in “No Outbreak Phase” must still be followed.

**Please Note:** The COVID-19 vaccine will not result in a false positive PCR or antigen test. An individual who tests positive for COVID-19 infection must follow the same guidelines as any other positive individual regardless of vaccination status. Additionally, all positive diagnostic tests, regardless of testing method, must be treated as true positives despite any subsequent negative test results obtained through any other testing method.

Please for more information please see:

- Required Personal Protective Equipment (PPE) for Healthcare Facilities at coronavirus.dc.gov/healthguidance,
- PCR, Antigen, and Antibody Tests at coronavirus.dc.gov/healthguidance
- Guidance for Healthcare Personnel Monitoring, Restriction, and Return to Work at coronavirus.dc.gov/healthguidance,

See also: DC Health Notice SARS-CoV-2 Antigen Testing at dhc.health.dc.gov/oase/health-notices

---

**Activity**

- Submit daily line list of residents and staff who are newly positive for COVID-19 to the Healthcare Facilities Investigation Team daily, Monday-Friday, excluding holidays (in accordance with DCMR Chapter 22B 208.2, 22B 201.1(ff) and 201.1 (gg), D.C. Official Code § 7-138).

**Please Note:** There is no need to report residents who are transferred into your facility with laboratory-confirmed COVID-19.

Submit at least weekly data to National Healthcare Safety Network (NHSN) Skilled nursing facilities:

- Reporting requirements for nursing homes became effective on May 8, 2020 when CMS published their interim final rule with comment: govnfo.info/content/pkg/FR-2020-05-08/pdf/2020-09608.pdf

Assisted living residences:

- While ALRs do not have the same federal requirement to report to NSHN as nursing homes, their participation is encouraged.

---

**Frequency of staff testing is based on the extent of the virus in the community as reported on the “CDC COVID-19 Data Tracker”.
- Testing frequency may be increased as directed by DC Health based on other factors (e.g., the level of community transmission in an adjacent or neighboring county/state where a large number of staff may reside).
- The “CDC COVID-19 Data Tracker” can be found at covid.cdc.gov/covid-data-tracker/#county-view.

PCR testing of staff is required for:

- Those who are NOT fully vaccinated.
- Those who are more than 90 days from a prior COVID-19 infection AND NOT fully vaccinated.

---

**Activity**

- All staff are PCR tested weekly regardless of vaccination status (excluding those isolated due to positive COVID-19 status at time of specimen collection or those positive within the previous 90 days and recovered) if:
  - ≥1 case in a resident ≥14 days after admission/readmission OR
  - ≥3 cases in staff within 14 days; OR
  - ≥3 cases in individuals (e.g., visitors, vendors) associated with a specific location/department within 14 days or epidemiological link within the facility. OR
  - It is determined necessary by DC Health after investigation/contact tracing.

**Please Note:** Routine testing intervals as indicated in “No Outbreak Phase” must still be followed.

---

**Activity**

- If initial testing reveals no additional COVID-19 cases and existing cases are contained within a single area/unit then weekly PCR testing (regardless of vaccination status) of exposed staff or staff on affected units continues.

**Exclude residents from testing who:**

- Are isolated due to positive COVID-19 status at time of specimen collection
- Have tested positive within the previous 90 days and recovered.

**Please Note:** Routine testing intervals as indicated in “No Outbreak Phase” must still be followed.
