CORONAVIRUS (COVID-19)

Situational Update

Monday, May 11, 2020
Since April 27, 2020

New confirmed cases over the past week:

- Monday, May 4: 152
- Tuesday, May 5: 139
- Wednesday, May 6: 193
- Thursday, May 7: 245
- Friday, May 8: 203
- Saturday, May 9: 170
- Sunday, May 10: 117

Average daily new positives over last 14 days: 178
Average daily individuals tested over last 14 days: 846
DC Health and the Department of Forensic Sciences are working with health care providers in DC to conduct a citywide sero-prevalence survey to understand the rates of exposure to COVID-19 in the District of Columbia.

The survey will focus on individuals with a high risk of exposure, including health care workers, first responders, essential workers, and individuals living in congregate settings.

**Serology testing** will help us determine the extent of infection and age-specific cumulative incidence, including the prevalence of asymptomatic or subclinical infections.
Even if we do everything right, reopening will lead to more infections and more loss of life.

Current hospital capacity (without surge beds): 71%

We hope to never need to use this site, but it will be here if we need it.
Even if we do everything right, reopening will lead to more infections and more loss of life.

Alternate Care Site

Hall A can accommodate 437 beds and is ready to accept 100 patients this week.

The alternate care site will begin accepting low-acuity COVID-19 patients when hospitals approach surge bed capacity.
Partnership between United Medical Center, MedStar Health, and DC Government

Alternate Care Site
This site is fully stocked with general medical and emergency medical supplies, including:

- Items from 2 Federal medical station caches
- 50 cardiac monitors and 50 AEDs
- Pharmaceuticals from the Strategic National Stockpile
- Ability to do onsite radiology and ultrasounds
- Onsite point-of-care lab work
Even if we do everything right, reopening will lead to more infections and more loss of life.

May 11, 2020

Other Features

- Multiple nurse stations with easy access to patient rooms
- Nurse call system that alerts staff to emergencies in each care space, shower, or bathroom
- Dedicated patient showers
- Dedicated staff showers and lounge area
- Dedicated fire alarm system
- Dedicated IT networks for staff, patients, and equipment
- Dedicated oxygen system
- Multiple redundant power backups

Hall A has been fully sealed off from the rest of the Convention Center, including the air handling system. Air is recirculated and filtered in a manner that is safe for Hall A, the rest of the building, and the outside environment.
Even if we do everything right, reopening will lead to more infections and more loss of life.
